

Blanking Panels

Features

- Toolless clips reduce installation time and costs
- Improves cooling effectiveness by preventing air bypass
- Brush strip blanking panel allows cables to pass through safely without disrupting airflow

Universal 19" mounting. Ideal for both fibre and copper applications. These blanking panels have been designed to fill any unwanted space in a rack whilst maximising airflow. The SRA designed toolless clips mean they can be clicked in easily without the use of cage nuts.

Details

All blanking panels are made from 1.5mm powdercoated zinc annealed steel.
